

EDITORIAL

Dear Academicians,

The Journal of Higher Education and Science has started its 10th year of publication with the issue of April 2020. The current issue came up with 20 articles, one review and 19 research articles. Presenting this issue, I would like to briefly share some of the developments in nine years from April 2011 to date we have experienced in our journal of which I have been the editor since the first issue.

During my editorial period, 381 articles including 112 reviews, 267 research articles and two letters to editors have been published in the regular issues of Higher Education and Science Journal, which have been meticulously adhered to projected printing dates and published every four months, three times a year. In 2012, a supplementary issue devoted to “Restructuring of Higher Education in Turkey” including 11 review articles was published.

I would like to emphasize that we pay attention and give priority to publish qualified articles in English and addressed from different countries, as we believe that this will increase the recognition and comprehensibility of our journal, among other goals.

As of March 2020, Higher Education and Science Journal is indexed in EuroPub Database, Humanities Index, OAJI, DOAJ, Index Copernicus, EBSCO (Education Source), DRJI, Zentralinstitut für Kunstgeschichte, WorldCat, TÜBİTAK-ULAKBİM, Google Academic, Turkish Education Index, Akademia Social Sciences Index (ASOS Index) and the Social Sciences Citation Index. We also expect the result of our application to the Science Citation Index database.

I sincerely thank those who contributed to the publication and to the current level of the journal; to our Rector Prof. Dr. Mustafa ÇUFALI and former Rector Prof. Dr. Mahmut ÖZER, to Prof. Dr. Hasan GERÇEK, Prof. Dr. Burak BAHADIR, Prof. Dr. Özlem KORAY and Assoc.
